Summary

Final-year B.Tech Computer Science and Engineering (Data Science) student with project experience in machine learning, computer vision, NLP, deep learning, explainable AI, Salesforce CRM automation, and full-stack development. Co-author of a 2026 publication on AI-generated image detection. Skilled in Python, Java, SQL, data structures and algorithms, and Git-based development.

Skills

Programming & CS: Python, Java, SQL, JavaScript, Object-Oriented Programming, Data Structures & Algorithms, Regular Expressions

Data Science & AI: Pandas, NumPy, Scikit-learn, Machine Learning, Deep Learning, NLP, Computer Vision, Medical Image Classification, CNN, Transformer Architectures, Attention Mechanisms, DenseNet121, NASNet, TF-IDF, Logistic Regression, Grad-CAM, LIME

Development & Tools: Git, GitHub, Jupyter Notebook, Google Colab, Flask, SQLite, Apache Kafka, MERN Stack, React.js, Node.js, Express.js, MongoDB

Salesforce: Salesforce CRM, Apex, SOQL, SOSL, Lightning Web Components, Flows, Agentforce, Prompt Builder

Projects

Hybrid CNN-Transformer Architecture for Multi-Class Lung Cancer Classification Deep Learning Project

- Developed a hybrid CNN-Transformer architecture with an attention mechanism for multi-class lung cancer classification using CT images.

AI-Generated Image Detection and Explainable AI Research Project

- Contributed to a deep-learning system that classifies real and AI-generated images using DenseNet121 and NASNet; applied Grad-CAM and LIME to interpret model predictions.

Fake News Prediction System Machine Learning Project

- Developed an NLP-based binary classifier using text cleaning, TF-IDF vectorization, and Logistic Regression; evaluated predictions using precision, recall, and F1-score.

AI Customer Support Agent Salesforce / Agentforce

- Built an AI-powered Salesforce Agentforce customer-support agent using Prompt Builder, Flows, Apex, and CRM data retrieval.

Publications

Detection of AI-Generated Images Using DenseNet and NASNet and Explainable AI Jan 2026

D. Kalyan et al.
(International Journal of Engineering Development and Research (IJEDR) | Paper ID: IJEDR2602308)

Certifications

- Salesforce Certified Agentforce Specialist | Trailhead: 100,000+ points and 200+ badges
- Apna College Sigma 8.0: Java, Data Structures & Algorithms, MERN Stack, and Aptitude
- NPTEL: Sensors and Actuators | Introduction to Internet of Things

Education

CMR Technical Campus, B.Tech in Computer Science and Engineering (Data Science) Jan 2027

- CGPA: 7.5/10 | Expected graduation: 2027
