Objective

Data Science undergraduate skilled in Python, Machine Learning, and Data Analysis. Experienced in building predictive models and data-driven web applications. Passionate about solving real-world problems using structured analytical approaches.

Skills

- Programming: Python, Java, SQL
- Web Technologies: HTML, CSS, JavaScript
- Libraries: Pandas, NumPy, Matplotlib, Scikit-learn
- Concepts: Data Structures & Algorithms, OOP, Machine Learning, Statistics
- Tools: Git, GitHub, VS Code, Jupyter Notebook
- Database: MySQL

Projects

- **Fake News Prediction using Machine Learning**
Tech: Python, Pandas, NumPy, Scikit-learn, NLP
 - Built a text classification model to detect fake news articles
 - Performed text preprocessing including tokenization and stop-word removal
 - Applied TF-IDF vectorization for feature extraction
 - Trained Logistic Regression and Random Forest models
 - Achieved 96% accuracy on test dataset
- **Ministry of Justice – Legal Chatbot Web App**
Tech: HTML, CSS, JavaScript
 - Developed a web-based legal information portal with integrated chatbot
 - Implemented keyword-based query matching for automated responses
 - Designed responsive UI for improved user interaction
 - Structured predefined legal database for accurate information retrieval
- **Dear Diary – Personal Journal Web Application**
Tech: HTML, CSS, JavaScript
 - Built an interactive journal application with dynamic entry creation
 - Implemented browser local storage for saving user data
 - Designed responsive layout for cross-device compatibility
 - Enhanced user experience using DOM manipulation

Education

- **CMR Technical Campus (Autonomous) | 2023 – Present** 3rd
B.Tech in Computer Science (Data Science)
CGPA: 7.5

Certifications

- BCG X – Data Science Job Simulation (Forage)
- British Airways – Data Science Job Simulation (Forage)
- Python for Data Science & Machine Learning – LinkedIn Learning
